C3.164: 930-E/960/6

U.S. DEPARTMENT OF COMMERCE Frederick H. Mueller, Secretary

UNITED STATES FOREIGN TRADE

SUMMARY REPORT FT 930-E JUNE 1960

FOR RELEASE

August 11, 1960

BUREAU OF THE CENSUS

EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic merchandise from \$1,775.6 million in May to \$1,700.8 million in June¹, a decline of about four percent, resulted from decreases in exports of finished manufactures, crude foodstuffs and crude materials being partly offset by increases in exports of semi-manufactures and manufactured foodstuffs. Although there was a decrease in the domestic merchandise export total from May to June, the June total was about 21 percent higher than the June 1959 total of \$1,406.5 million. Data on M.S.P. (military shipments are included in these totals.

With M.S.P. (military) shipments excluded, domestic merchandise exports during June were valued at \$1,600.8 million, a level about five percent less than the May total of \$1,681.6 million, but about 20 percent more than the \$1,330.9 million reported in June 1959.

Exports of <u>finished manufactures</u> fell from \$1,051.9 to \$975.7 million. This decrease was due in part to lower levels of exports of individual commodities included in this economic class as follows: Special Category Type 1 commodities, from

¹Revised from the figure of \$1,703.2 million published in the June 1960 issue of Report No. FT 900-E.

\$40.5 to \$26.3 million; automobile parts for assembly and replacement, from \$52.2 to \$47.2 million; passenger cars, from \$17.3 to \$13.0 million; metalworking machines and parts, except machine tools, from \$14.8 to \$10.7 million; tractors, from \$22.4 to \$18.6 million; and commercial motor trucks and busses, from \$38.6 to \$55.4 million. Exports of cryotextracemolecuter-superscript. Exports of cryotextracemolecuter-superscript. The decrease exports of cryotextracemolecuter-superscript. The decrease exports of cryotextracemolecuter-superscript. The decrease exports of cryotextracemolecuter-superscript. The decreases were reported in exports of oilseeds, from \$33.2 to \$26.1 million, and unmanufactured cotton from \$69.6 to \$65.4 million.

Meanwhile, exports of <u>semimanufactures</u> rose from \$310.0 million in May to \$332.7 million in June. The chief factors in this rise were gains in exports of iron and steel plates, sheets and strips, from \$32.9 to \$40.3 million; crude vegetable oils and fats, from \$11.0 to \$15.1 million; and tin mill products, from \$10.8 to \$14.4 million. The advance in exports of <u>manufactured foodstuffs</u> from \$81.0 to \$90.5 million was chiefly the result of increases in exports of dairy products from \$5.6 to \$9.0 million, and manufactured foodstuffs for relief or charity, from \$8.9 to \$11.4 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: The value of export shipments individually valued at \$100-\$499 (about five percent of total export value) is estimated by sampling. Effective with the statistics for January 1960, the previous sample ratio of 10 percent has been increased to a 50 percent sample for countries other than Canada with the 10 percent sample being retained for Canada. The estimated values are distributed among the individual commodity totals. For the 1960 export figures in this report, the probable variability due to sampling is less than \$50,000 or less than a trivial percentage which can be ignored. For periods prior to 1960, the probable variability due to sampling is less than \$50,000 or less than two percent of the individual totals shown. The largest variation from reunding of figures is \$50,000. For further information regarding sampling procedures, see the September 1953, February 1954, January and June 1956, and the October-December 1959 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: JUNE 1960 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Figures for 1960 are as originally issued and have not been revised to include published corrections. Figures for 1959 include revisions published with the December 1959 reports, or earlier, but do not include revisions published during 1960. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts. See "Explanation of Statistics" for information on sampling procedures and effect thereof on data shown.)

*Revised from the figure of \$1,703.2 million published in the June 1960 issue of Report No. FT 900-E.

¹Includes \$100.0 million of Military Mutual Security Program shipments (\$31.8 million to Western Europe).

²Includes \$94.0 million of Military Mutual Security Program shipments (\$25.8 million to Western Europe).

³Includes \$75.6 million of Military Mutual Security Program shipments (\$50.1 million to Western Europe).

³Includes \$102.3 million of Military Mutual Security Program shipments (\$54.9 million to Western Europe).

⁵See the April 1958 issue of Foreign Trade Statistics Notes for explanation of Special Categories and list of commodities included.

7For security reasons, data on exports of all forms of uranium, thorium and special nuclear material (Schedule B commodity numbers 62510-62590) are excluded from export statistics.

⁵Includes data for Schedule B commodity numbers 30399 and 30855, converted to square yards on the basis of four square yards per pound; and B number 30610, converted to square yards on the basis of three square yards per pound.

°Figures are revised to correct erroneous inclusion of data for Schedule B commodity number 79080 (Commercial maintenance and repair trucks, new) in the totals for "All other finished manufactures" rather than "Military automobiles, trucks, busses, trailers, parts, accessories and service equipment; commercial maintenance and repair trucks, new" in the issues of Report No. FT 930-E for periods prior to January 1960.
